

Natalie's Ladybird Survey

Natalie Whitehead is an M.Sc. student in Environmental Consultancy at Newcastle University. For her M.Sc. dissertation she is conducting the first comprehensive survey of ladybirds native to Newcastle. As part of this survey Natalie is surveying Moorside and she has already discovered on Moorside the only ten spot ladybird.

Natalie would value your help in recording lady birds you see whilst working on your plot between

Saturday the 18th July and Saturday the 8th August.

All you have to do is record the number of ladybirds in each of the categories detailed on page two.

Please also fill in the following

Name and plot number:-.....

How many days of observation do your figures on page two refer to?

Please drop your completed forms off at the trading hut, or post in the red post box inside the middle gate, by Sunday the 9th August at 12.00 noon

Thank you for your help

(Extra forms available at Trading Hut)

	Common Name	Number
 <p>5-8mm</p>	7-spot ladybird	
 <p>4-5mm</p>	2-spot ladybird	
 <p>4-5mm</p>	Cream Spot Ladybird
