

## **LOOKING FOR REASONABLY PRICED TIMBER FOR RAISED BEDS?**

The Trading Hut has sourced some ex-scaffolding planks in good condition, which are available to allotment holders and would make excellent shuttering for raised beds.

The planks are in an assortment of sizes, the most popular being either 6 feet or 13 feet long. Depth is 9 inches. The timber is untreated, therefore free of any toxic preserving fluids.

We aim to obtain a quantity of both the above sizes, subject to demand. Price, on the basis we order 100 planks, including delivery charges, would work out at £3.50 for a 13 ft length or £1.75 for a 6 foot length. Our suppliers suggest that you may need a height equivalent to two planks e.g. 18 inches, so please take this into consideration.

We'd like to make one bulk order to save on delivery charges and are therefore taking advanced orders now. Please either place your order with the trading hut during opening hours (Saturday and Sunday 10 am to 12 noon) or email [Susie@moorsideallotments.co.uk](mailto:Susie@moorsideallotments.co.uk) We are not asking for money at this stage. You can pay once we take delivery.

As the gardening season is almost upon us, we would like to order these planks as soon as possible and get stocks in before the end of March, so please let us know if you would like to take advantage of this offer and the quantity you need.
